

Conference on lynx conservation working routines
11th of September 2020
Online Zoom event

Lynx conservation working routines on population and national/transnational level

Objectives:

- to get informed on existing and planned lynx conservation approaches on population and national level with special regard to transboundary cooperation
method: presentations
- to discuss and further develop relevant topics in terms of structural and organisational conservation approaches
method: small group workshop
- to deduce recommendations for the BBA population level approach
method: plenary discussion

Agenda:

Morning Session 10.00 - 13.00:

Each presentation 10-15 min, addressing specific topics like data exchange and routine analysis, genetic monitoring and remedy, population viability analysis, responsibilities of implementation and evaluation of action plans/conservation strategies, involvement of interest groups.

Regional/National approaches: 10.00 - 11.30

1. Management plan for lynx in the Czech republic - Martin Strnad
2. Management plan for lynx in Bavaria - Manfred Wölfl
3. Conservation Strategy for lynx in Germany - Sybille Wölfl
4. Lynx conservation activities /initiatives in Austria - Thomas Engleder
5. Lynx conservation in the Carpathians - Jakub Kubala
6. Swiss Lynx Concept - Anja Molinari-Jobin

Transboundary/population based approaches: 11.45 - 13.00

7. European Perspective: Strategy for the recovery and long-term conservation of metapopulations of the Eurasian lynx in West and Central Europe: results from Bonn conference June 2019 and current status. - Manfred Wölfl
8. Pan alpine conservation strategy for lynx - Anja Molinari-Jobin

9. Status and reinforcement of the Dinaric-SE Alpine lynx population - Rok Černe
10. BBA conservation strategy - Manfred Woelfl

Preparation for afternoon session

Lunch 12.45 - 14.00

Afternoon Session 14.00 - 17.00:

Small group workshops: 14.00 - 15.00:

Discuss and visualize specific issues in 4 working groups addressing the following topics:

1. Data management and population viability analysis - Kirsten Weingarth
2. Genetic monitoring - Jarmila Krojerová
3. Responsibility of implementation and evaluation of conservation actions -
Manfred Woelfl
4. Involvement of interest groups - Moritz Klose

Presentation of workshop results (each 5-10 minutes): 15.15 - 15.45

Plenum discussion: 15.45 - 17.00
