2. Brief description of the locality and situation

The place identified by Brezno for the revitalisation activity is called Brezno mesto train station “Malá stanica” (“Small Station”).

Brezno, a town in central Slovakia, is a main access point to Horehronie area and National parks. It is located on the rail line between Banská Bystrica and Červená Skala. Further rail lines link to Tisovec and Hriňová.

Brezno has two train stations. The main railway station is combined with the bus station but is located on far of town. Brezno mesto train station is located near the town centre.

The station building and adjacent space are in desperate need of refurbishment. The waiting area of the station has been inaccessible for years.

First floor offices spaces can be rented. Outside there is one platform with toilets for passengers. The whole space is deteriorated and inappropriate for public transport.

Current planning includes a library and gallery in the ground floor, spaces to be designed by local young artists. It will be used as meeting room for Youth Parliament. Another part of ground floor is exhibition (railway museum) accessible from the former ticket hall.

The exterior of station will be transformed to more pleasant space for travelling public by creating communal gardens, placing street furniture, small playground for children and bicycle stand (including e-bikes) which will be used for bike sharing.

The station building and surrounding space is owned by Slovak Republic. It is no longer used for services of Slovak Railways.

The owner of the building has no plan for its revitalisation. The size of the building is 123 square meters. Slovak Railways are interested in the project and probably they will do small necessary maintenance work.
