

## D.T2.5.7 - Summer Camp

---

Transnational youth summer camps

Version 2

Finale Emilia 23-24/08/2021

08 2021

---

Prepared by aMo

With the contribution of:

Andrea Burzacchini  
Daniele Paolino  
Daniele Berselli

## 1. Introduction

aMo has a great attention to the needs of people with disabilities as regards the area of local public transport.

For this reason aMo started a collaboration with the non-profit society Rulli Frulli which deals with the insertion of young people with disabilities in society.

Since Rulli Frulli was looking for a new location and identified the spaces available in the Finale Emilia bus station for their headquarters and while the YOUMOBIL project deals with the revitalization of abandoned railway stations, it was decided to implement the YOUMOBIL Summer Camp with Rulli Frulli as the main points of the YOUMOBIL project would have been taken into consideration that are improving the mobility of young people in rural areas and the recovery of abandoned buildings.

Furthermore, the decision to dedicate the YOUMOBIL Summer camp to the revitalization of the Finale Emilia bus station was also made to support a concrete follow-up project that will be effectively implemented.

On 23 and 24 August 2021 aMo carried out the activities related to the Summer Camp provided for by the YOUMOBIL project together with the Rulli Frulli association.

Rulli Frulli is a non-profit Association that aims to integrate children with disabilities through music that operates in Finale Emilia, a city of about 16,000 inhabitants located in the rural northern part of the province of Modena.

The heart of the Association is the musical band which now has over seventy members between teenagers and young people, girls and boys aged 11 to 20

Rulli Frulli also focuses on aspects usually considered "parallel" to musical activity:

- Research of sound and its nuances;
- Workshops for the construction of musical instruments using recycled materials (pipes, tiles, pots, bins of various materials, washing machine baskets, etc.);
- Integration and interaction for different ages and abilities, aiming for the maximum involvement of everyone, each with the maximum of their possibilities;

Rulli Frulli is looking for a new head quarter to carry out his musical activity and to realize it; the spaces currently free in the Finale Emilia bus station have been identified as the internal premises at ground floor of the bus station are no longer used

Currently on the first floor of the building there are already the Rulli Frulli workshops that need larger spaces.

Fig. 1 - Bus station of Finale Emilia

The possibility of using the large spaces on the ground floor also represents a great opportunity to concentrate all the activities of the Association in one place.

Since these spaces are currently managed by aMo as part of the public transport services carried out in the Province of Modena, a collaboration is being born between aMo and Rulli Frulli aimed at restructuring the spaces of the bus station to make them as functional as possible to the needs of the Association.

As part of this collaboration, the activities of the YOUMOBIL 2021 Summer camp took place on 23 and 24 August 2021 at the Rulli Frulli laboratories where there were 14 young people involved in musical activities and instrument construction.

In particular, the activities that have been carried out were the following:

- Presentation by aMo of the YOUMOBIL Project;
- General evaluation with the young people present of the re-use layout of the spaces on the ground floor of the bus station.

Fig. 2 - Young people of Rulli Frulli who participated in the Summer camp

An inspection of the spaces available on the ground floor was carried out and a rough layout was identified for future activities.

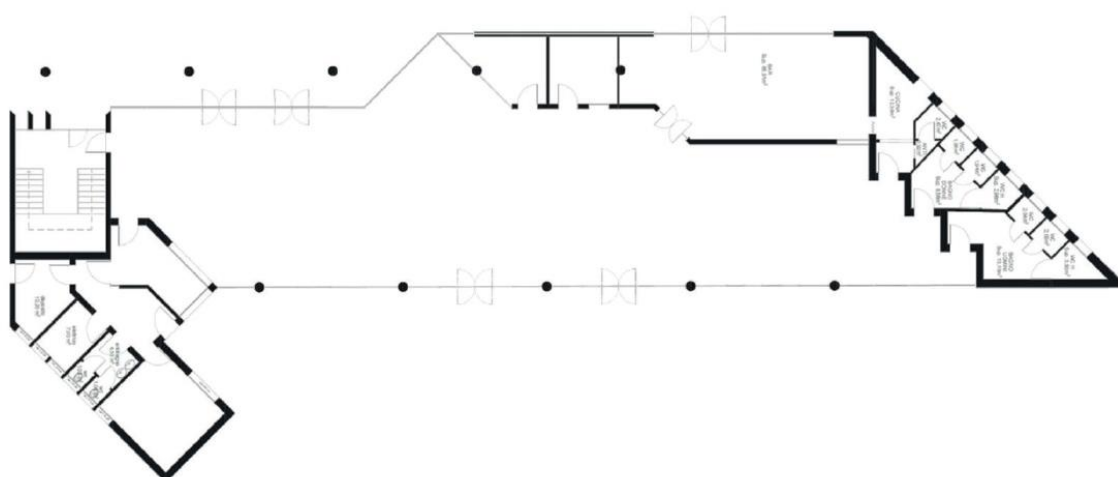

Fig. 3 - Actual layout of the ground floor

In particular, the following spaces have been identified, based on the characteristics of the building and the needs of the Association:

- ✓ A space dedicated to the rehearsals of the musical band;

- ✓ A space with the function of a shop where the children's products made in the laboratory will be marketed;
- ✓ A space used as a bar;
- ✓ A space used as a kitchen.

Starting from a map of the current situation showed in Fig. 3 together with the students, the layout identified was drawn with PowerPoint, which is the one in Fig. 4.

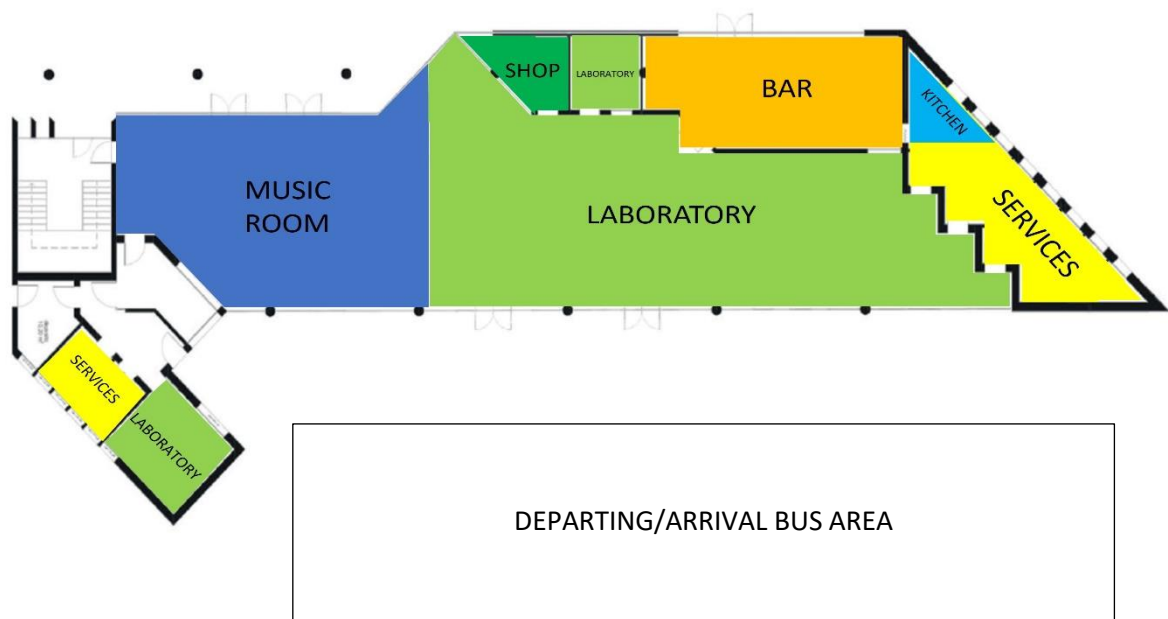

Fig. 4 - Planned layout of the ground floor

Most of the design and renovation costs will be sustained by companies that are sponsors of the Association, aMo included.

As the new headquarters of Rulli Frulli is located at a bus station, a training course has been identified that can lead the children to use the public transport service independently so that they can be, where possible, as independent as possible in their displacements.

The types of trips of the children present have been identified and the cases in which the use of public transport is feasible have been identified; this activity will be carried out with all the children who will access the new structure.

aMo has given its willingness to provide free passes for public transport for children who will be interested in this initiative.

The Summer camp ended with the agreement to meet again and periodically to monitor the phases of the activities that have been identified.
