1. Introduction

The project objectives were presented on the 5th Regional scientific meeting on Quaternary geology dedicated to geological hazards and Final conference of the LoLADRIA project "Submerged Pleistocene landscapes of the Adriatic Sea" in Starigrad Paklenica held on 9th and 10th November 2017. In a short presentation that followed after the expert one titled "Mineralogical, geochemical and micromorphological characteristics of red palaeosol situated on the limestone of the base of the Pleistocene loess-palaeosol sequence in Savudria Croatia, the PROLINE-CE aims were introduced to the attending participants that were mostly constituted of members of higher education and research institutions. It was an effort to reach out to new possible stakeholders.
