Output factsheet: Tools

Version 1

Project index number and acronym	CE906 BOOSTEE-CE
Lead partner	Fondazione Bruno Kessler (FBK)
Output number and title	Output O.T4.2 EE financing roadmaps for public infrastructures
Responsible partner (PP name and number)	PP8 Municipality of Velenje
Project website	https://www.interreg-central.eu/Content.Node/Boostee-ce/BOOSTEE-CE.html
Delivery date	January 2020

Summary description of the key features of the tool (developed and/or implemented)

The prepared document focuses on issues related to the overall topic of energy efficiency in public buildings, that could be used to increase knowledge, capacities and skills of building owners, managers and decisions makers, enabling them to successfully implement sustainable energy measures in their buildings. The prepared document will help municipalities with finding cost savings and define the way to reinvest them in order to continuously improve Energy efficiency in public and other buildings in order to reach some planned reductions of energy and CO2 use in the field of energy efficiency. The financing roadmap will help employees in the field of maintenance and construction in municipalities to fund the diverse energy efficiency measures and technologies on one place and with that fulfill the short and long terms and plans on the field of energy efficiency.

NUTS region(s) where the tool has been developed and/or implemented (relevant NUTS level)

- NUTS 1 - SI0 Slovenia
- NUTS 2 - SI03 Eastern Slovenia
- NUTS 3 - SI034 Savinja Statistical Region
- LAU 2 - SI-133 City Municipality of Velenje

Expected impact and benefits of the tool for the concerned territories and target groups

Prepared document can help municipalities with preparing strategies for urban planning, with managing the energy efficiency measures for public buildings and other fields and for better and faster fulfilling planned reductions of CO2 according to strategies, with better estimation and planning energy consumptions, etc., preparing municipality budget.

Sustainability of the tool and its transferability to other territories and stakeholders

Prepared document is focused on situation in the whole country. Other municipalities in Slovenia face the same restrictions in financing energy efficiency improvement in public buildings as Municipality of Velenje. Presented ways or possibilities of financing energy efficiency improvement in public buildings are more suitable for bigger municipalities, but some of them are suitable also for smaller ones. The prepared document can also help some of the energy agencies.

Lessons learned from the development/implementation process of the tool and added value of transnational cooperation

It was identified in the process of preparing financing roadmaps that in this moment we are in between two periods. Some of the documents, strategies and plans about energy efficiency is expiring and others are under preparation phase. Also we find a lot of possible different ways of financing improvement the energy efficiency of public infrastructures. There were also several obstacles identified in the use of certain funding options.
