ENERGY@SCHOOL ON AIR

Dear Readers!
ENERGY@SCHOOL project is approaching its final phase. Junior Energy Guardians have just started the Game and we are working hard on various communication events & publications. Stay with us and find out what we have achieved !

Let's start the Game!

On 1st February we launched the Game - Juniors and Seniors are playing via APP in all 7 countries involved till the end of March! They are looking for sources of waste energy in schools so called Ghosts - and trying to catch them - resolve the problem. Before the Game started, all Partners had led the training courses on it. The winners - so the schools which achieved the biggest energy savings - will go on study visit to Italy and Poland. So goodluck and may the best man win!

Communication activities ahead of us

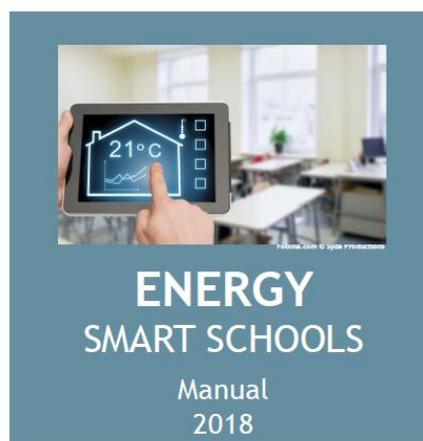

BarCamp in Bydgoszcz, Poland

The last period of the project is full of interesting communication activities. We are recording Storytelling movie about the project, preparing animated Tutorial on Energy Smart Schools, printing project Manual and Brochure. Special interactive workshops - BarCamps are also expected in all countries engaged. The first BarCamp took place in Bydgoszcz, Poland in February - it was exciting time full of positive energy and innovative ideas.

Recordings for Storytelling

Final meeting in Lugo, Italy

In 3 months we will meet in Lugo, Italy at Final Meeting of ENERGY@SCHOOL project. In Lugo everything started and in the same place we will be celebrating the final stage of the project. All Partners do its best, so keep your fingers crossed for the Final Meeting in Lugo.
