

INTERREG CENTRAL EUROPE YOUMOBIL

Brezno mesto - Malá stanica (Small station)

FUTURE PLANS OF REVITALIZATION

- ° The Town Brezno is situated directly in the heart of Slovakia, in the Horehronie valley.
- ° You can enter the town from any direction, the road will always bring you to its heart, to the square which is recognizable from a long distance by the town's bell tower.
- ° Brezno is economic, administrative, cultural and social centre of the region. Valuable sacral and public buildings surrounded with verdure, burgher's houses in late baroque and neoclassical style adorn the historical inner town.
- ° Town offers great opportunities in agriculture and tourism. One of the main means of "how to get there" is a train.

FUTURE PLANS OF REVITALIZATION

- ° The size of the building is 123 square meters.
- ° First floor offices spaces can be rented. Outside there is one platform with toilets for passengers. The whole space is deteriorated and inappropriate for public transport.
- ° Current design is based of sugestions from business subjects, Youth Parliament and students. It includes a library and gallery in the ground floor, spaces to be designed by local young artists. It will be used as meeting room for Youth Parliament. Another part of ground floor is exhibition (railway museum) accessible from the former ticket hall.
- ° The exterior of station will be transformed to more pleasant space for travelling public by creating communal garden, placing street furniture, small playground for children and bicycle stand (including e-bikes) which will be used for bike sharing, terrace overlaped with wooden pergola.
- ° Revitalization of railway station and surrounding area will bring better access to touristic attractive points in region Horehronie .
- ° The central motive of the whole design is to create an environment that will respect the significant natural values and dominants of the area and at the same time create conditions for a quality environment in terms of public space for people with different opportunities. The basic principle of the solution was to create a central space with a direct view of the platforms and the surrounding countryside. This corresponds to holding the original lines between the platform and the building. The creation of new buildings in line with the building respects the distances required by Slovak rail-ways. With this urban solution, each building gets in touch with the central space and at the same time retains its connection to the surroundings.

Ambitions of urbanism:

- compositionally clearly legible and spatially unambiguous territory, which respects the conditions and limits of the site, is not closed to itself, integrates the environment and develops it,
- keep a reference to the original architecture and history of the area,
- effective interconnection of individual functions in the site,
- resolve a communication links.

SPECIFIC IMPACTS ON SOCIETY

- Positive impact on the inhabitants of the town of Brezno, who travel for work or to schools in the nearest regional town or other cities in Slovakia. The quality and comfort of traveling by public train will increase. The implemented activities will also contribute to the beautification of the environment of a small train station.
- Raising awareness and interest in train history, which is very diverse in the region thanks to the train's uniqueness in the region not only for train enthusiasts but also for residents and especially the young generation of pupils and students.
- Thanks to the planned activities, increasing the attractiveness of traveling by train with the possibility of connecting to cycling in the region. The influx of a larger number of tourists, which will result in an increase in the inflow of economic resources, especially within the tourism industry - an increase in the number of overnight stays in the city and its urban areas. Increase in revenues in follow-up services - catering, additional services, sports or wellness services and others.
- Improving relations with young people in the newly created spaces, which will offer them a place to implement their ideas - youth parliament, exhibitions and openings on various topics, social and charitable small events and others.
- Attracting new groups of tourists. Mainly older people, who use mainly more advantageous train transport, but also young people and students who do not have their own means of transport.
- Attracting new tourists - those interested in train history with a connection to existing train products in the region, such as Čiernohronská železnica n.o., ride the historic train during the main tourist season "Horehronská express"
- Preservation and beautification of a dilapidated building and its surroundings, which can be an important transport point for locals who come to work or study in the town.
