

Expression of interest in a REEF 2W feasibility study (cooperation agreement)

The undersigning public authority/wastewater utility Abwasserverband Braunschweig (AVB) declares its interest and willingness to support a REEF 2W feasibility study in their wastewater facility.

This agreement does not guarantee the elaboration of a feasibility study. The final decision will be made by the undersigning local REEF 2W project partner after the evaluation of all potential national feasibility study sites.

In the case of selection, the feasibility study will be carried out by the undersigning local REEF 2W project partner in the foreseen timeframe of the project (finalisation by end of May, 2020).

The cost for planning, engineering and reporting of the feasibility study will entirely be covered by the REEF 2W project budget. The undersigning public authority/wastewater utility will neither be charged any related costs nor is obliged to make any further actions and investments that may be proposed by feasibility study. However, the undersigning public authority/wastewater utility confirms that it will provide all necessary data at their own expenses.

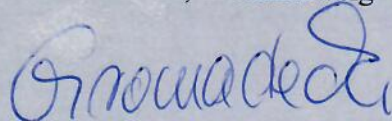

The undersigning national REEF 2W project partner declares that all data provided by the public authority/wastewater utility will be used solely for purposes of developing the feasibility study and will not be used otherwise.

Results will only be published after prior consultation with the undersigning public authority/wastewater utility.
