## Output factsheet: Trainings

Version 1

Project index number and acronym	CE946; REEF 2W
Lead partner	ENEA
Output number and title	O.T4.2. - Trainings curricula for nearing public administrations to REEF 2W implementation (Croatia)
Responsible partner (PP name and number)	REGEA (PP10)
Project website	<a href="https://www.interreg-central.eu/Content.Node/REEF-2W.html">https://www.interreg-central.eu/Content.Node/REEF-2W.html</a>
Delivery date	03.2020.

### Summary description of the implemented training measure(s), explaining the specific goal(s) and target groups

The REEF 2W partners agreed on rough content for the training of the PAs but no joint full curricula was prepared. It was agreed that the trainings should be more tailor-made for the local demands and thus the final curricula in each country was designed by the local partners. Additionally, the REEF 2W partners agreed that it would be impossible to bring together relevant stakeholders for a 2-day training as originally planned. Thus, it was decided that shorter trainings are possible and that each country should plan the length of the trainings based on the local demand. The Croatian training session was planned for 1 day.

The Croatian Curricula consist of: Scope and Purposes, Learning Methodology and Lessons Organization, Teachers CV and Auxillary Materials.

Specific goal is to reach chosen target group and train them/educate on possibility of implementing REEF 2W solutions on their WWTPs. Chosen target group are public authorities and utility companies that manage WWTPs.

### NUTS region(s) where training(s) have been conducted (relevant NUTS level)

NUTS regions concerned with: On NUTS 1 level there is NUTS-1: Croatia (Code HR0), on NUTS 2 level there is Krapina-Zagorje County (as primary targeted county, Code HR043).

## Expected impact and benefits of the trainings for the concerned territories and target groups

The training Curricula was designed in order to achieve the following impact and benefits:

1. to provide an overview on the REEF 2W project and the methodology developed,
2. to describe the application of the REEF 2W tools for any WWTP interested in pre-assessment,
3. to present feasibility study for the Croatian case study
4. to present a strategy to implement the REEF 2W concepts in Croatia
5. to raise awareness and potentials of REEF 2W solutions implementation in Croatia

## Sustainability of the training(s) and developed training material(s) and their transferability to other territories and stakeholders

The presentations and material used for training were made available after the training to all trainees/participants in form of .pdf files. Also this materials are ready to be available to other stakeholders from different counties/regions especially the ones targeted by regional strategy, because transferability to other territories and stakeholders is evident.

## Lessons learned from the development and implementation of training measures and added value of transnational cooperation

The chosen format and time scope of training (1 day) proved to be sufficient. Feedback from trainees as well as our impressions give us certainty to say that training was very successful and that we raised a lot of interest among trainees for this subject and REEF 2W project in general. Also idea to merge it with D.C.7.2. proved to be right because various stakeholders can be addressed using this (one) training. All this proved that Curricula was rightly structured and formed.
