## Output factsheet: Trainings

Version 1

Project index number and acronym	CE946; REEF 2W
Lead partner	ENEA
Output number and title	O.T4.5. - Trainings of PAs in the five countries for nearing them to REEF 2W (Croatia)
Responsible partner (PP name and number)	REGEA (PP10)
Project website	<a href="https://www.interreg-central.eu/Content.Node/REEF-2W.html">https://www.interreg-central.eu/Content.Node/REEF-2W.html</a>
Delivery date	12.2019.

### Summary description of the implemented training measure(s), explaining the specific goal(s) and target groups

The REEF 2W partners agreed that it would be impossible to bring together relevant stakeholders for a 2-day training as originally planned. Thus, it was decided that shorter trainings are possible and that each country should plan the length of the trainings based on the local demand.

The Croatian training of the PAs was organised by REGEA and took place on 27 Nov 2019 (from 09:30 to 13:00) at Energy Center Bračak in Zabok, Krapina-Zagorje County. The training was held in conjunction with the Workshops for policy makers, municipalities, and regional representatives (D.C.7.2.)

### NUTS region(s) where training(s) have been conducted (relevant NUTS level)

NUTS regions concerned with: On NUTS 1 level there is NUTS-1: Croatia (Code HR0), on NUTS 2 level there is Krapina-Zagorje County (as primary targeted county, Code HR043)

## Expected impact and benefits of the trainings for the concerned territories and target groups

The training was designed in order to achieve the following impact and benefits:

1. to provide an overview on the REEF 2W project and the methodology developed,
2. to describe the application of the REEF 2W tools for the Croatian case study WWTP Zabok,
3. to present feasibility study for the Croatian case study WWTP Zabok
4. to present a strategy to implement the REEF 2W concepts in Croatia
5. to raise awareness and potentials of REEF 2W solutions implementation in Croatia

## Sustainability of the training(s) and developed training material(s) and their transferability to other territories and stakeholders

The presentations and material used for training were made available after the training to all trainees/participants in form of .pdf files. Also this materials are ready to be available to other stakeholders from different counties/regions especially the ones targeted by regional strategy, because transferability to other territories and stakeholders is evident.

## Lessons learned from the development and implementation of training measures and added value of transnational cooperation

The chosen format and time scope of training (1 day) proved to be sufficient. Feedback from trainees as well as our impressions give us certainty to say that training was very successful and that we raised a lot of interest among trainees for this subject and REEF 2W project in general. Also idea to merge it with D.C.7.2. proved to be right because various stakeholders can be addressed using this (one) training. Since we focused with this training on Krapina-Zagorje County we believe that we managed to make some community cohesion over pilot project located in Zabok (WWTP Zabok).
