

D.T4.1.1.

# LIST OF AUSTRIAN MUNICIPALITIES/ REGIONS

Interested in exploring the opportunity and  
feasibility of REEF 2W

Made by BOKU

---

## A) GENERAL APPROACH

---

As also described in the deliverables mentioned below, in Austria, the following activities were set to collect feedback of stakeholders interested in the REEF 2W approach (wastewater utilities, municipalities, energy managers, etc.):

- Workshop for policy makers, municipalities and regional representatives (D.C.7.2/D.T4.3.2): During the event REEF 2W project representatives took the opportunity for (preliminary) talks with different attendees. Furthermore, a list of stakeholders interested in the topic of energetic use of wastewater was collected (list of interest).
- Workshop for public utilities and energy agencies (D.C.7.1): During the event REEF 2W project representatives took the opportunity for (preliminary) talks with different attendees. After the event a related note was published in the newsletter of the Austrian climate and energy model regions inviting interested stakeholders to participate in an additional REEF 2W case study.
- In addition, interested wastewater utilities/municipalities actively approached Austrian REEF 2W representatives (BOKU) to learn something about the project approach and energy generation from wastewater.

## B) LIST OF INTERESTED STAKEHOLDERS

---

The following includes interested stakeholders for wastewater utilities, municipalities and regional/federal authorities. Feedback from academics, engineering consultancies and company representatives are not being listed. This is for the fact, that they are not considered a primary target group for additional trainings and/or cases studies at this stage of the project.

No.	Municipalities and regional/national authorities	Contact Person
01	Federal ministry for Sustainability and Tourism	Senior official
02	City of Vienna (MA 45)	Senior official
03	Provincial government of Lower Austria (WA 4)	Senior official
04	Region of Upper Styria West	Senior official
05	Region of South-West Styria	Senior official
06	Provincial government of Carinthia	Senior official
07	District of Spittal an der Drau	Senior official
08	Austrian Water and Waste Association	Senior official

No.	Wastewater utilities	Contact Person
09	RHV Schwanenstadt u. U., RHV Lambach	Senior official
10	GAV Wolkersdorf/Pillichsdorf/Großengersdorf	Senior official
11	AV Unteres Rodltal (energy region Urfahr West)	Senior official
12	WV Mürzverband, city of Kapfenberg	Senior officials
13	GAV Vösendorf (energy region Vösendorf)	Senior officials
14	RHV Mühlthal & Region Böhmerwald	Senior official/mayor

### **C) EVALUATION OF RESULTS**

---

Based on the three activities mentioned above, Austrian REEF 2W representatives collected the following expressions of interest (concerning general information on energetic use of wastewater/the REEF 2W approach and potential feasibility studies, respectively):

- as indicated in the tables above
- 8 municipalities and regional/national authorities
- 6 wastewater utilities (municipalities/energy regions)  
and in addition
- 8 (energy and wastewater related) companies
- 10 (energy and wastewater related) engineering consultancies
- 11 academics representing 2 Austrian and 2 non-Austrian Universities

### **D) NEXT STEPS**

---

It is intended

- To collect further information in regard to stakeholder expectations concerning the entire topic of energy generation from wastewater (compare D.T4.1.2 and D.C7.3) and
- to identify most promising sites/boundary conditions for carrying out an additional Austrian feasibility study (compare D.T4.3.3, D.T.4.3.4 and D.T4.3.5).

Therefore

- the stakeholder survey collected during the workshop for policy makers, municipalities and regional representatives (D.C.7.2/D.T4.3.2) will be further evaluated and
- (selected) stakeholders (of the groups mentioned above) will be re-consulted.
